# Custom Invitations and DIY Supplies

## How does custom ordering work?

We have four basic cost tiers.

If you are ordering from one of our templates that allows for entry of personalized data with zero changes to the layout, generally you pay zero print file creation fees as no proof or draft is created. When your order total for a printed item from our personalized templates exceeds \$300, a mandatory approval is required on a digital draft before printing. Should a typographical error be found prior to approval an edit can be made. If the order value is below \$300, no draft or opportunity to correct errors is possible.

- \$0 for personalized (no proof) listings with zero interaction
- \$30 for PDF supplied by customer
- \$30 for text and or graphic supplied by customer (4 line limit)
- \$40 five or more lines supplied by customer
- \$100+ custom image creation from digital art files

If you have a PDF file that you bought or made, you can submit that file at the time of ordering. Generally, these fall under the \$30 setup cost for print file creation. Information on our requirements for file generation available upon request. If your art is intended to bleed over the edge of the printed page, we need margins included with evident crop marks indicated. Digital drafts and proofs are provided.

If you are ordering an item with four or fewer lines of text, with or without a simple graphic, generally you are in the \$30 setup fee per print surface stream for print file creation. Digital drafts and proofs are provided. This item would have a \$60 setup fee (30 for each side).

If you are picking popular items like below, you would supply your text, font choice and paper selection as well as the \$40 setup fee. Digital drafts and proofs are then created.

If you want to use one of our thousands of graphic art pieces, plus your own text generally the cost for creation of your print file is \$30. Here is an example of the combined piece. Digital drafts and proofs are provided.

If you want to combine up to three of our graphic art pieces and use them throughout your suite of print files, generally you will spend \$100 on the creation of the art plus \$30 to \$40 for the print file creation for each item. Here is an example of the combined piece. Digital drafts and proofs are provided. We do not offer manipulation of the color or design of the art files, other than rotation, sizing and placement.
